Notes:

ABC and OY are based on Preliminary Annual Specifications document - August 2008.

Trawl percentage is based upon GAC recommendation to PFMC April 2008, Table 1, page 4 and modified by the January 2009 GAC recommendations.

The allocation for Sablefish takes 10% off the top for tribes, 8% off the balance for Open Access and then divided 42% for Fixed Gear and 58% for Trawl.

Whiting is 267545 mt minus 35,000 mt for tribes. Percent is shorebased allocation.
